BIG BANG SANTE - L AVENIR SE CREE AU PRESENT

MAISON DE LA CHIMIE, on October 9

PARIS, 14.10.2019, 19:25 Time

USPA NEWS - We live longer, our DNA can be mapped and Researchers can predict our Risk of getting ill, new Drugs are being developed all the Time, we know that it's a Good Idea to exercise and eat Greens. One of the most important Tasks of Science is preventing and understanding why so many People become ill, and Scientists are currently debating how best to use Technological Advances and New Knowledge to ensure the Best Public Health...

We live longer, our DNA can be mapped and Researchers can predict our Risk of getting ill, new Drugs are being developed all the Time, we know that it's a Good Idea to exercise and eat Greens. One of the most important Tasks of Science is preventing and understanding why so many People become ill, and Scientists are currently debating how best to use Technological Advances and New Knowledge to ensure the Best Public Health.

Dementia is a Blanket Term covering Diseases where the Brain loses its Functions. As well as Alzheimer's and Parkinson's Diseases there are many other illnesses and some are yet to be classified. While Researchers are becoming better at preventing, treating or relieving Diseases such as Cancer, Type 2 Diabetes and Heart Ailments, they still know very little about Diseases that affect the Brain's Functions.

One thing is taking up the Minds of many Doctors around the World these days and it is one of the Largest Current Threats to World Public Health: Resistance to Antibiotics... The more Antibiotics we use, the faster Bacteria develop Resistance (and we use a lot in Agriculture, in Hospitals, and in our Homes).... Food Allergies are seen as a Serious Public Health Issue in many Countries... Scientists have developed Proteins that can make Synthetic Genetic Material evolve over Generations in a Similar Way to DNA. The Breakthrough could lead to a Completely New Form of Medicine...

In Digital Society, Knowledge is well distributed Virtually and Online. A Substantial Fraction of Knowledge Landscapes is also located in the Digital Environment. Both Health and Knowledge need to be understood today as a part of the Digital Society. It is important to estimate the Impact that Digital Society has on Knowledge Landscapes and on Health....Digital Health is the Convergence of Digital Technologies with Health in order to enhance the Efficiency of Healthcare Delivery and make Medicine more Personalized and Precise. The Technologies include both Hardware and Software Solutions and Services, including Telemedicine, Web-Based Analysis, Email, Mobile Phones and Applications, Text Messages, Wearable Devices, and Clinic or Remote Monitoring Sensors. Generally, Digital Health is concerned about the Development of Interconnected Health Systems to improve the use of Computational Technologies, Smart Devices, Computational Analysis Techniques, and Communication Media to aid Healthcare Professionals and their Clients manage Illnesses and Health Risks, as well as promote Health and Wellbeing.

Can we improve Training for Health Professionals? Sustainable Social Health Development requires more than Technical Knowledge and Skills Training alone. Health Professionals (Providers, Managers, and Administrators) need to respond to their Individual Challenges at Specific Times and in Particular Places. It is no longer appropriate to focus on a Single Issue; wickedly Complex Problems are the Primary Tasks of these Professionals... Health Professionals should have Access to Quality Training for them to fulfil their Respective Roles and Functions for Sustainable Development, especially at Local Levels. Unfortunately, this is often not the Case, or at the very least, we could certainly make Improvements.

Food Technologies play a Pivotal Role in improving the Nutritional Quality of Food, ensuring its Safety, and preventing Foodborne Disease. They reduce Losses due to Spoilage or Contamination, and are thus Vital in the Prevention of Malnutrition and Starvation. Food Technologies also have important Socioeconomic Implications. They facilitate and promote Trade in Food, provide Employment for a large Section of the Population, facilitate the Work of Women in preparing the Family's Food, and give them the Opportunity to participate fully in Social Life. They increase the Consumer´s Pleasure and provide a greater Choice of Products.

On October 9, 2019 @ Maison De La Chimie (Paris) was held the New Edition of BIG BANG SANTE - LE FIGARO.
